Jaipur, Rajasthan, India | +91-7014217098 | profile.shivam@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable, high-performance web applications using React.js, TypeScript, NestJS, and PostgreSQL. Creator of Streamverse, an open-source NPM package for real-time audio/video streaming. Skilled in architecting secure APIs, optimizing databases, and delivering production-ready solutions with a focus on performance and user experience.

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, Chakra UI, React Router, React Query, D3.js, Recharts
- **Backend:** Node.js, NestJS, Express.js, JWT Auth, Redis, Rest APIs
- **Database:** PostgreSQL, TypeORM, MySQL, Database Schema Design
- **DevOps & Tools:** Git, Docker, Postman, Firebase

WORK HISTORY

Wisflux Tech Labs

Jun 2022 - Present

Full-Stack Software Engineer

Jaipur

- Engineered full-stack applications using React.js, TypeScript, NestJS, and PostgreSQL, enhancing performance and scalability across multiple SaaS modules.
- Architected modular backend services with NestJS, integrating JWT authentication, role-based access control, and API versioning.
- Optimized database schemas and API logic, reducing response latency by up to 30% and improving server-side efficiency.
- Dockerized development environments, accelerating onboarding and aligning with microservices deployment practices.
- **Represented Wisflux Tech Labs at the ATR Open House 2025 (Kyoto, Japan)** – Showcased real-time communication solutions in offline environment and engaged in technical collaborations with ATR team.

PROJECTS

Streamverse – an open source stream sharing SDK. (npmjs.com/package/streamverse)

- Published an NPM package enabling audio, video and screen sharing with seamless WebRTC, socket.io and Mediasoup SFU.
- Designed a developer-friendly API for rapid integration of real-time communication features in modern web applications.

TripMate – a trip management platform with real-time expense tracking.

- Developed secure user authentication and role-based access control for trip visibility.
- Built REST APIs for trip creation, expense tracking, and real-time member balance updates.

Typezap – a gamified typing practice platform with real-time feedback (typezap.com)

- Built a progressive module system with instant feedback on accuracy and WPM.
- Introduced multiplayer “challenge mode” to boost user engagement.

FLOS - a disaster response communication tool (alwacs.com)

- Engineered real-time messaging, voice/video calling, and alert modules using WebSockets, Mediasoup, and ASR for hands-free emergency communication in low-connectivity environments.
- Integrated AI-based speech recognition (ASR) and TTS for multilingual SOS and accessible interactions.

EDUCATION

Anand International College of Engineering, Jaipur

2019 - 2023

Bachelor of Technology, Computer Science Engineering (CGPA: 8.5)

Ravindra Bal Bharti Public School, Jaipur

2018 - 2019

Senior Secondary, Science Stream (Percentage: 74%)

CERTIFICATIONS

- **Accenture Developer Program** : Forage (June 2021)
- **Programming Fundamentals**: Duke University (May 2020)

LANGUAGES

- English (Proficient), Hindi (Native)
